

MANTIS TASK/GENERAL LIGHTING INSTALLATION GUIDE

Precautions —

Risk of electrical shock. Disconnect power before servicing or installing product.

Risque de choc électrique. Coupez l'alimentation avant l'entretien ou l'installation du produit.

Risk of injury. Wear safety glasses and gloves during installation and servicing.

Risque de blessure. Porter des lunettes de sécurité et des gants lors de l'installation et de l'entretien.

Risk of injury or damage. Unit will fall if not installed properly. Follow installation instructions.

Risque de blessures ou de dommages. Unité va tomber s'il n'est pas installé correctement. Suivez les instructions d'installation.

Risk of injury or damage. LED light sources achieve full intensity immediately after powered. Do not look directly into lights.

Risque de blessures ou de dommages. Sources de lumière LED parvenir à pleine intensité immédiatement après sous tension. Ne regardez pas directement la lumière.

-Introduction –

The Mantis Task series fixtures provide attractive illumination for Task lighting needs. Available in advanced White LED which provides years of service while significantly reducing energy usage. The fixtures reflectors which are a part of the heatsink will provide the optimal light pattern for general and task lighting needs.

This luminaire is designed to be used in ambient temperatures of -20C to +40C (-4F to +104F) and be mounted horizontally with the light source down. This luminaire is rated for damp locations. It should not be mounted in wet locations in which water can flow into the luminaire.

—— Getting Started———

UNBOXING

Our packaging is designed to protect the luminaire during shipping. Please inspect to confirm it was not damaged during the process.

HANDLING

Once unpacked, the luminaire can become damaged if mishandled. Do not stack luminaires after unpacking.

PACKAGE CONTENTS

- Light fixture (assembled)
- Installation Instructions
- Mounting clips
- Junction box lid with screw

— Installation—

It is recommended to first mount the fixture in the desired position before wiring.

MOUNTING

The Mantis series lights use a unique clip mounting system. The fixture can be mounted to ceilings, suspended or mounted to other surfaces.

- Secure the mounting clips to the ceiling or mounting surface. Clips are available to support bolt, rod or conduit mounting. Make sure the fixture is mounted at the appropriate height for the application. Use appropriate hardware for the mounting surface and make sure to follow any local or other code or requirements.
- 2) Push the fixture into the clips. It may help to clip one side then push the fixture to lock in the other side of the clip. Make sure the fixture is fully engaged into both clips. The clips were designed to hold over 100 pounds of downward force and severe vibration conditions.
- 3) Clean fixture with a non-abrasive mild soap or neutral PH cleaner to rid them any installation smudges.

– Wiring –

Make all electrical connections in accordance with the National Electrical Code and local code requirements. Verify that supply voltage is correct by comparing it to the product label. The wire lead from the luminaire power supply should be connected to the service wiring.

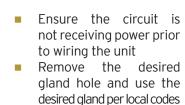

The standard power supply will have the following connections:

WIRE COLOR **FUNCTION** Green/Yellow Ground Brown or Black A/C Line Blue or White A/C Neutral

Ensure that the gland provides sufficient strain relief to prevent damage to the unit

- Connect the incoming ground with the junction box grounding wire (Terminal not included)
- Insert the line into the terminal labeled AC-L
- Insert the neutral wire into the terminal labeled AC-N

Connect the diming wire to the terminals marked "0-10V (Dim-)" and "0-10V (Dim+) if used.

——————————————————————————————————————
To maintain efficiency, the LEDs lens should be cleaned with a mild soap or neutral PH cleaner . Abrasives or cleaners containing chlorinated or aromatic hydrocarbons should not be used. Once clean, rinse with water and wipe dry using a soft cloth.
